Type justification:	Presence of a valid pollution discharge permit, environmental acceptance certificate, stable manufacturing staff and activity profile (synthetic materials production).

Positive facts identified in the company analysis

№	Fact	Interpretation
1	**Authorized capital payment**	The declared capital of 1 million yuan has been paid in full by the shareholders.
2	**Tax discipline**	The company holds a Class "A" tax rating for 2017-2018 and 2021-2024, indicating high financial transparency and no tax arrears.
3	**Litigation activity**	In court cases related to sales contracts, the company acts exclusively as the plaintiff, recovering debts from counterparties. This confirms active protection of its own commercial interests.
4	**Environmental permits**	The presence of a valid emission permit confirms actual production activity at the declared address.
5	**Ownership structure**	Transparent structure: beneficiary Gao J. controls 28.57% directly (1 ownership level). Control concentration is low, structural risks are minimal.
6	**Annual reporting**	Reports have been submitted without gaps since the company's founding.

Risks and facts requiring attention

№	Fact	Interpretation
1	**Staff dynamics**	A steady decline in insured employees from 24 (2019-2020) to 15 (2024) has been recorded. Clarification of current production capacity is required.
2	**Discrepancy between claimed history and registration date**	Public sources (Baidu Encyclopedia) claim the company's history dates back to 1999, but the legal entity was registered in 2013.
3	**Intellectual property**	The company has no registered patents, only 2 trademarks.
